-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Title

1. The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 1-16 are rejected under 35 U.S.C. 102(e) as being anticipated by Crookham et al. (US 6,681,110).

Crookham teaches an industrial controller (Remote Equipment Controller 10 or gateway system 22) for at least one of a machine tool, robot, and a production machine, comprising:

a converter (PLC's relays) which associates predefined operating states, of at least one of the machine too, the robot, and the production machine, on an individual operating-state basis to respective at least one of message and alarms so that, if one of the predefined operating states is present, a notification about which one of the predefined operating is present is sent to a predefined distribution group, the notification including at least one of an SMS message and an email; (col.8, line 47-col.9, line 3)

Art Unit: 2143

a table which associates each of the predefined operating states with:

- i) a respective distribution group to whom the notification is to be sent, and (customers 26, via email or fax)
- ii) information to be included in the notification, (“Each registration message can be a verification of the information sent in the forward channel direction, or else each registration message can contain data. There may be multiple verification messages or multiple data messages or both” col.19, line 59-)

wherein after one of the predefined operating state is detected, the respective at least one of message and alarm associated with the one of the predefined operating state is sent via the notification to the respective distribution group associated with the detected predefined operating state, the respective at least one of message and alarm including the information associated with the detected predefined operating state; (notification received by the controller; col.17, line 31- col.18, line 65))

wherein the email has a file attached to it; (“As shown in FIG. 3, a customer can be notified via email or fax that the schedule has been entered into Central Control and/or carried out at the customer's lighting systems.”)

an operating keyboard to effect the association by editing; (cell phone key pad; pc keyboard) and

wherein the converter is configured to initiate a bit poll, the bit poll for polling at least one system component for operation state information. (col.17, line 64)

Response to Arguments

Art Unit: 2143

4. Applicant's arguments with respect to claims 1-16 have been considered but are moot in view of the new ground(s) of rejection.

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jeffrey C. Pwu whose telephone number is 571-272-6798. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, David Wiley can be reached on 571-272-3923. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
